

System Id	Presentation title
0007	Silver Spoons and Toxic Soups: The Impact of Wealth on Health Risk Perceptions Near a California Hot Lab
0011	An Analyses of Flood Risk Management Strategies: A Case Study of Rize Türkiye
0016	Traceability of genome editing in plants poses a challenge to risk regulation
0017	Civic Coalition against Democratic Backsliding in Crisis Response: Following the 2022 Halloween Crowd Crush in Seoul
0020	Hazard and risk: how to communicate the difference between these two concepts across Europe?
0022	Innovative methods for communicating the difference between hazard and risk to the European public
0031	Table-top exercise for identifying communication-related vulnerabilities in disasters
0033	Does climate change risk perception influence people’s intention to invest in solar farms vs. nuclear power plants?
0037	Developing Risk-Informed Sustainable Development Policies: Directions for Disaster Risk Management at National and Subnational Levels
0042	Mapping the links between social impacts and social capacities to support flood risk planning and management
0043	Community resilience in highly urbanized volcanic areas: the case study of Campi Flegrei in Southern Italy
0045	It aint over til its over: Long-term implementation and coping processes in a voluntary relocation scheme in Austria
0046	Feeling hot is being hot? Comparing the mapping and the surveying paradigm for urban heat vulnerability in Vienna
0047	Planning for the worst: Responding to flood risk through preventive relocation in Northern Italy
0049	Avoiding unintentional poisonings with household chemicals: Comparing the appeal to children from the perspectives of children, caregivers and experts
0061	Assessing organisational resilience in micro, small scale enterprises: in search of the right resilience indicators.
0070	Non-homogeneous communities and implications for planned relocations. The case of Pedrinhas and Cedovém, in Portugal.
0075	Planning for the worst: European experiences of relocation in the context of flood risk
0079	Does climate change distress undermine environmental policy support? An examination of climate change anxiety, fatigue, scepticism and inefficacy in Korea

0084	Experiences and challenges in communicating hazard and risk in Greece
0093	Risk evaluation regarding potential retrieval of nuclear waste. A case study with a group of German citizens.
0096	How can different risk perception between public and private sector affect security of critical maritime infrastructure against unknown threats?
0118	Global Perspectives on Climate Risk Assessments: An evaluation of local climate risk assessments for effective adaptation planning.
0125	Introducing the Risk-Tandem Framework as a Holistic Approach Towards the Assessment and Governance of Systemic Risks.
0128	Setting the Stage for Innovating Systemic Risk Assessment and Governance
0150	From Risk to Resilience: Evaluating the Marmara Region Through the Resilience City Index
0169	Philosophical aspects of cost-benefit analysis in seismic risk prevention: A critical evaluation
0181	Promoting disaster preparedness and resilience by co-developing stakeholder support tools for managing systemic risks of compounding disasters: PARATUS project.
